

## The memorability of visual images

Khosla, Raju, Torralba, Oliva (2015) & Isola, Parikh, Torralba, Oliva (2011)

high memorability

low memorability

Amazon Mechanical Turk

- 60,000 photographs
- consistency across observers
- objective memorability scores

→ **LaMem database**

1

## Visual memory experiments

- vigilance repeats every 1-7 images
- memory repeats every 91-109 images
- 30 game levels, 120 images per level (~ 5 mins)
- ~80 scores per ~60,000 target images

2

## Large difference in image memorability + high consistency across observers

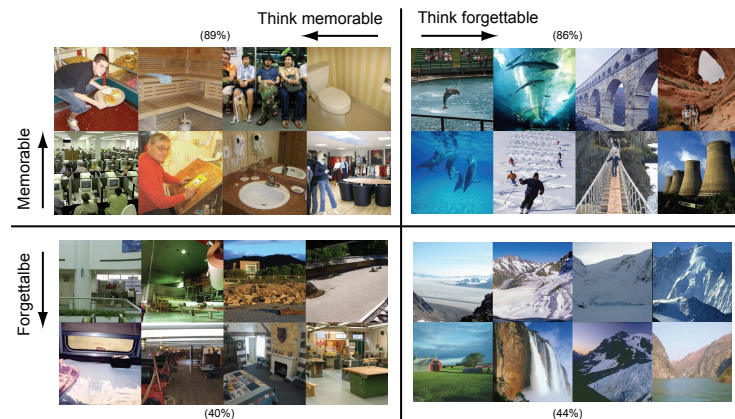

Mean HIT rate: 67.5% • SD: 13.5%  
Mean False alarm rate: 10.7% • SD: 7.6%

Isola et al (2011). IEEE CVPR

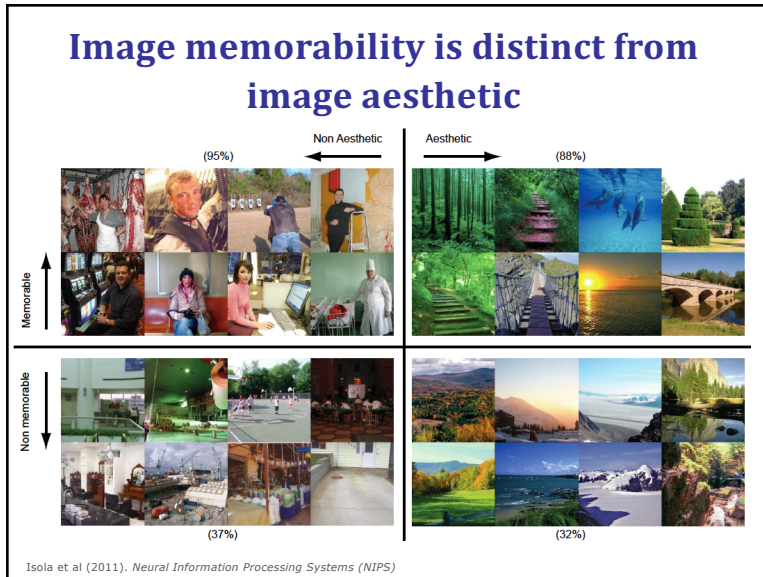

3

## Subjective judgments do not predict image memorability

Isola et al (2011). Neural Information Processing Systems (NIPS). PAMI (2014)

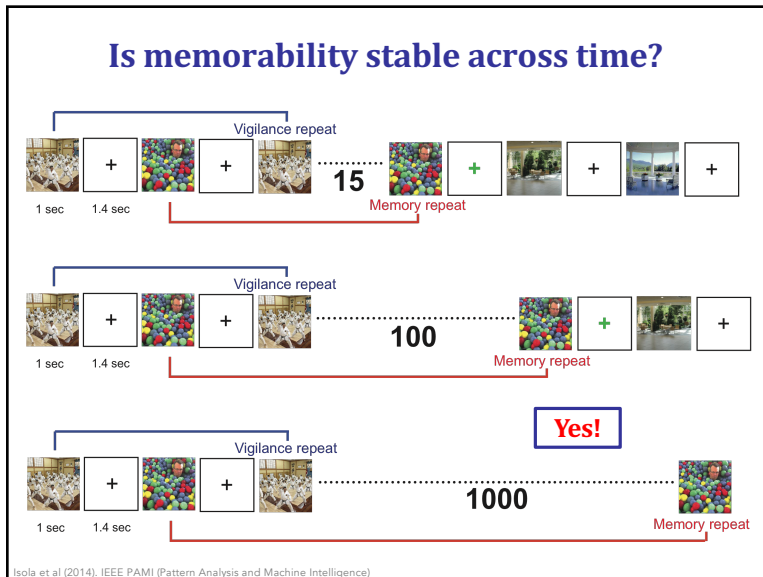

4

5

6

7

8

## Large scale visual memorability

60,000 photographs with memorability scores

**most memorable**

**less memorable**

<http://memorability.csail.mit.edu/>

9

## Scene Understanding: Context and Objects

10

# places

10 million images, 460 categories

**AlexNet**

[places.csail.mit.edu](http://places.csail.mit.edu)

11

## MemNet: CNN to predict image memorability

Khosla, Raju, Torralba, Oliva (2016) *Understanding and Predicting Image Memorability at a Large Scale*. <http://memorability.csail.mit.edu/>

12

### Visualizing CNN “features”

conv5

fc7

average of images that maximally activate neurons in two layers near output of MemNet (ordered (top to bottom) by correlation with memorability)

13

### Visualizing receptive field of MemNet neurons with strong positive or negative correlation with memorability

strong positive

strong negative

14

### Which image regions are memorable?

generate a *memorability map*: scale up the image size, apply MemNet to overlapping subregions

original image	memorability map	high
<p>0.80</p>		<p>0.84</p>
<p>0.81</p>		<p>0.72</p>
<p>0.63</p>		<p>0.84</p>

use memorability map to de-emphasize the less memorable details

AMT experiment shows highlighted regions contribute to higher memorability scores

15

### Preserving most memorable regions

*applications of memorability work?*
