

# iMovie for the HelpDeskers

## **iMovie documentation**

<http://www.wellesley.edu/Computing/Imovie/imovie.html>

## **Demo differences:**

no technical setup so using DV camera as VCR  
things may behave a little bit differently

## **The beginning:**

grab the clips  
reorder clips  
deselect clips  
play the movie

## **Working with individual clips:**

play one clip  
drag playhead  
copy and paste a clip  
Reverse clip  
create a still image  
set in/out points and crop  
split clip at playhead  
delete clip – trash and undo

## **Fancy Stuff:**

“correct” order to work in  
text – imovie text and image text  
effects  
transitions  
sound – recording, grabbing and importing  
extract audio from a clip and paste at playhead  
speed up and slow down clips  
recovering raw video clips

## **Exporting:**

Default and Expert Settings

## **Size:**

length of the file, content, compression codec and movie dimensions  
backing up files – CD, zip, file size of raw vs. compressed files
