

About how many hours did you spend actively working on this assignment? _____

1. Minima and Maxima

a.	b.
c.	d.

2. Two's complement conversions

Decimal to 8-bit two's complement representation	16-bit two-complement representation to decimal
$107_{10} =$	$0x5F8C =$
$-107_{10} =$	$0xCAFE =$

3. Unsigned arithmetic

$$\begin{array}{r}
 00101101 \\
 + 01101111 \\
 \hline
 \end{array}
 \quad
 \begin{array}{r}
 11111111 \\
 + 11111111 \\
 \hline
 \end{array}
 \quad
 \begin{array}{r}
 00000000 \\
 - 11111111 \\
 \hline
 \end{array}$$

$\text{Sum}_2 =$

Overflow?

(circle one) yes no

yes no

yes no

4. Two's complement arithmetic

$$\begin{array}{r}
 00101101 \\
 + 01101111 \\
 \hline
 \end{array}
 \quad
 \begin{array}{r}
 11111111 \\
 + 11111111 \\
 \hline
 \end{array}
 \quad
 \begin{array}{r}
 00000000 \\
 - 11111111 \\
 \hline
 \end{array}$$

$\text{Sum}_2 =$

Overflow?

(circle one) yes no

yes no

yes no

5. CSAPP3e Homework Problem 2.77

5a. $x * 17$	
5b. $x * -7$	
5c. $x * 60$	
5d. $x * -112$	

6. CSAPP3e Homework Problem 2.826a. $(x < y) == (-x > -y)$

Circle one: yes no

Why? (Brief description or counterexample)

6b. $((x + y) << 4) + y - x == 17 * y + 15 * x$

Circle one: yes no

Why? (Brief description or counterexample)

6c. $\sim x + \sim y + 1 == \sim(x + y)$
Why? (Brief description or counterexample)

Circle one: yes no

6d. $(ux - uy) == -(unsigned)(y - x)$
Why? (Brief description or counterexample)

Circle one: yes no

6e. $((x >> 2) << 2) <= x$
Why? (Brief description or counterexample)

Circle one: yes no

7. Absolute Value

7a. Argument decimal notation	7b. Argument binary representation
7c. Return value decimal notation	7d. Return value binary representation

7e. Explain error.

7f. (Challenge) Fix function.
